Bringing Back the Natives Garden Tour and Green Home Features Showcase: See Your Neighbors' Native Plant Gardens and Electrified Homes!

Registration for the free, Twentieth Annual [Bringing Back the Natives Garden Tour and Green Home Features Showcase](#) is now open. This year there will be four days of inspiration: two days on-line, and two days in-person, and, for the third time the Tour will also showcase homes with green home features.

On-line Tour

The on-line Bringing Back the Natives Garden Tour and Green Home Features Showcase will take place on the week-end of April 6 and 7 from 10:00-3:00. This event will be kicked off on April 6 with a keynote presentation by the inspirational, best-selling author Doug Tallamy.

The on-line tour will feature beautiful native plant gardens that attract birds, bees, and butterflies, talks by gardening experts, and visits to homes with solar panels and backup batteries, heat pumps for heating and cooling the house and heating water, induction ranges, and more.

In-person Tour

The award-winning in-person Bringing Back the Natives Garden Tour and Green Home Features Showcase will allow registrants to [visit more than sixty beautiful, water-conserving native plant gardens](#) on Saturday, May 6

and Sunday, May 7, from 10:00-5:00. All of the homes have native plant gardens; twenty will be sharing their green home features, including solar panels and batteries, induction ranges, heat pumps, and more.

Registrants will learn how design a native plant garden for color and interest throughout the year, garden for wildlife, lower their water bills, protect their family's health and the environment by gardening without using pesticides, and electrify their homes.

What's special about California native plants? They are adapted to our soil and climate, naturally water conserving, and easy to care for. California native plants are better than non-native plants when it comes to attracting native birds, butterflies, and other forms of wildlife. And, as the gardens on the Tour show, these lovely gardens display a sense of place that is uniquely Californian.

For more information, about the garden tour contact Kathy@KathyKramerConsulting.net or call (510) 236-9558 between 9 a.m. and 6 p.m.

Calendar Listing

See Your Neighbors' Native Plant Gardens and Electrified Homes!

See Your Neighbors' Native Plant Gardens and Electrified Homes!

Join the free Bringing Back the Natives Garden Tour and Green Home Features Showcase on-line event on April 6 & 7 from 10 am - 3 pm to see beautiful native plant

gardens that attract birds, bees, and butterflies, hear from local gardening experts, and “visit” homes with solar panels and backup batteries, heat pumps for heating and cooling the house and heating water, induction ranges, and more.

During the free in-person Tour from 10 am - 5 pm on May 4 & 5 more than 60 homeowners in Alameda and Contra Costa Counties are opening their native plant gardens, and some of them will open their homes. Learn how to design a native plant garden for color and interest throughout the year, garden for wildlife, lower your water bills, and garden without using pesticides. Ask homeowners who have electrified about the heat pumps, induction ranges, solar panels, batteries and more they have installed to replace methane gas-powered products. The Bringing Back the Natives Garden Tour and Green Home Features Showcase is free, but advance registration is required [here](#).
